Explanation of Non-GAAP Financial Measures

Allscripts reports its financial results in accordance with U.S. generally accepted accounting principles, or GAAP. To supplement this information, Allscripts presents in this supplemental data package non-GAAP revenue as well as non-GAAP gross profit and non-GAAP gross margin, which are non-GAAP financial measures under Section 101 of Regulation G under the Securities Exchange Act of 1934, as amended.

- Non-GAAP revenue consists of GAAP revenue as reported and adds back deferred revenue and other adjustments recorded for GAAP purposes.
- Non-GAAP gross profit consists of GAAP gross profit as reported and adds back deferred revenue and other adjustments booked for GAAP purposes and excludes acquisition-related amortization, stock-based compensation expense, and non-recurring expenses and transaction-related costs. Non-GAAP gross margin consists of non-GAAP gross profit as a percentage of non-GAAP revenue, as defined above.

Management also believes that non-GAAP revenue, gross profit, and gross margin provide useful supplemental information to management and investors regarding the underlying performance of Allscripts business operations. Acquisition accounting adjustments made in accordance with GAAP can make it difficult to make meaningful comparisons of the underlying operations of the business without considering the non-GAAP adjustments provided and discussed herein. Management also uses this information internally for forecasting and budgeting, as it believes that these measures are indicative of core operating results. In addition, management may use non-GAAP revenue, gross profit and gross margin to measure achievement under Allscripts stock and cash incentive compensation plans. Note, however, that non-GAAP revenue, gross profit and gross margin are performance measures only, and they do not provide any measure of cash flow or liquidity. Non-GAAP financial measures are not in accordance with, or an alternative for, measures of financial performance prepared in accordance with GAAP and may be different from non-GAAP measures used by other companies. Non-GAAP measures have limitations in that they do not reflect all of the amounts associated with Allscripts results of operations as determined in accordance with GAAP. Investors and potential investors are encouraged to review the reconciliation of non-GAAP financial measures with GAAP financial measures contained within the company's press release dated November 5, 2015.
